# **Colten Judice**

Phone: 817-291-0377 | Email: coltjobhunt@protonmail.com | Github: https://github.com/gitcolt

## **WORK EXPERIENCE**

#### **National Instruments**

August 2022 - December 2023

Software Engineer

- Developed an <u>electric vehicle battery testing software suite</u> and integrated with other NI products, namely SystemLink, Veristand, and TestStand
- ❖ Contributed to C#/.NET and Angular codebases
- Performed a massive refactoring task in a large enterprise codebase without disturbing other contributors' work
- ❖ Wrote XML schema for test definitions
- Wrote comprehensive justifications and descriptions for all pull requests
- Squashed bugs during a time crunch before product release
- Wrote regression tests to validate behavior of new and existing features
- Implemented course and granular exception handling to provide useful information to the user for rectifying problems
- ❖ Wrote reactive, asynchronous, event-based code with RxJS

#### **American Airlines (contract role)**

November 2021 - August 2022

Software Engineer

- ❖ Ported an aircraft maintenance scheduling application from Delphi to .NET/C#
- Contributed to a React flight schedule monitoring application
- Discussed and made decisions about architecture

#### Ayoka Systems

August 2020 - November 2021

Software Engineer

- Build custom enterprise applications (.NET/C#, Google Cloud, AWS, Vue, embedded Linux, Yocto, Mender)
- Contributed to several projects simultaneously
- Acted as the primary liason between the company and project stakeholders
- Mentored and delegated tasks to junior developers

# **EDUCATION**

#### The University of Texas at Austin

August 2020

Bachelor of Science and Arts Computer Science Minor in French
